

## Medicated Shampoo and Conditioner Instructions

1. Before shampooing, brush fur for 10 minutes.
2. Place cotton balls in each ear to help prevent ear infections due to water in the ears.
3. Shake shampoo bottle well before use.
4. Wet the hair with tepid water.
5. Massage shampoo deep into hair coat and skin for at least 10 minutes. Set a timer, as it will take longer than it “seems.”
6. Rinse thoroughly with clean, cool water for 10 minutes.
7. Shake conditioner bottle well before use.
8. Put 1 to 2 tablespoons in a quart container of cool to tepid water.
9. Pour this over the fur and massage into the wet hair coat
  - \*Do not rinse. Gently towel dry.
  - \*If you notice greasiness when his coat dries, use less conditioner at the next bath.
  - \*Always apply conditioner after every shampooing.
10. Take cotton balls out of ears and clean with an approved ear cleaner, if advised.

NOTE: Because it takes such a long time to do a medicated shampoo and conditioning it is important to set a timer so you know you are doing it for the right amount of time.
